Department of Water Resources

PROPOSITION 50 CHAPTER 6(a) WATER DESALINATION GRANTS – 2006 FUNDING CYCLE

FINAL FUNDING AWARDS

(September 20, 2006)

Desalination is gaining considerable attention from scientists, resource planners, policy-makers, and other stakeholders. The main driving force for this renewed interest in water desalination is the remarkable technological advancement in desalination processes, which has recently led to a much lower cost of desalinated water than was previously attainable.

In 2003, the California Water Desalination Task Force was convened by the California Department of Water Resources (DWR) pursuant to Assembly Bill 2717 to look into potential opportunities and impediments for using brackish water and oceanwater desalination in California, and to examine what role, if any, the State should play in furthering the use of desalination technology. One of the primary recommendations was that economically and environmentally acceptable desalination should be considered as part of a balanced water portfolio to help meet California's existing and future water supply and environmental needs.

The California Desalination Task Force identified the potential water supply benefits associated with the increased use of desalinated water as well as the challenges facing California in regard to large scale desalination use. In this context, DWR will continue its efforts to provide technical and financial assistance to pursue this important and emerging water supply strategy.

In November 2002, California voters passed Proposition 50, the Water Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002. Chapter 6(a) of Proposition 50 (Water Code Section 79545(a)) authorized DWR to administer a \$50 million desalination grant program. The grant program aims to assist local public agencies with the development of new local potable water supplies through the construction of feasible brackish water and oceanwater desalination projects and help advance water desalination technology and its use by means of feasibility studies, research and development, and pilot and demonstration projects.

This is the second round of funding under this grant program. DWR carried out the first round during FY 2004-2005 by awarding \$24.75 million to 24 different projects. DWR released the second round draft 2006 desalination Proposal Solicitation Package (PSP) for public comment on October 13, 2005. Two public workshops to provide information about the draft PSP and to describe the application and review processes were subsequently conducted in Sacramento and in San Diego. The final PSP was released on January 26, 2006 and an informational public workshop was conducted in Sacramento on February 10. Approximately \$21.5 million in grants on a 50% cost share was available for this funding cycle to be disbursed to desalination projects that help generate new or alternate potable water supply and to help advance desalination technologies.

Entities involved with water management activities including: cities, counties, joint power authorities, public water districts, universities and colleges, tribes, nonprofit organizations, watershed management groups, State agencies, and federal agencies were eligible to apply.

The Department received 49 applications (proposals) by the due date of Friday March 24, 2006. The applications consisted of 12 construction project proposals, 17 pilot proposals, 13 research and development project proposals, and 7 feasibility study proposals. The total funds requested by these applications amount to approximately \$57.5 million while the total cost of the 49 proposed projects is \$543.5 million.

Applications were evaluated by two independent review panels. A 22-member technical Desalination Review Panel (Panel) was composed of members representing local, State, and federal agencies, as well as other stakeholders and experts in technical, environmental, and economical aspects. On May 28, the technical review and ranking of the applications were completed. The six-member State Agency Desalination Funding Team (Team), representing DWR, Department of Health Services, Energy Commission, Department Fish and Game, the State Water Resources Control Board appointed by DWR, met on May 30 and selected the applications to be recommended to receive funding based on the Panel's scores and recommendations. The Team recommended the amount of funding to be granted for each individual application and splitting the available funds of \$21.5 million to support 23 different projects. A ranking list of the reviewed projects as recommended by the Desalination Review Panel and adopted by the State Agency Desalination Funding Team is provided in Attachment A.

On June 23, DWR conducted a public workshop to provide information about the selection process, announce the projects recommended for funding, and review the award contracting process. DWR also opened a comment period on the Draft Staff Funding Recommendation until June 26 ([DWR News Release, June 12, 2006](#)).

Based on the review process as presented above and after careful consideration of the comments received, DWR decided to fund 24 different projects including: four construction, nine pilot and demonstration, seven research and development, and four feasibility studies. An additional construction project was awarded partial funding after additional information was received during the comment period. Originally the project was to be completed before funding could be made available by contract. Because the project was delayed, some essential work is now eligible to receive funding. A listing of all the 24 projects awarded funding are presented below. Summaries of these projects can be viewed at http://www.owue.water.ca.gov/recycle/DesalPSP/Summaries_Awarded_2006.pdf.

FUNDING DISTRIBUTION BY PROJECT CATEGORY

Project Category	Number of Awarded Projects / Total Applications Received	Awarded Projects Total Cost	Awarded Grant Amount	State Share to Total Cost
Construction Projects	4/12	\$79,615,000	\$9,000,000	11%
Feasibility Studies	4/7	\$1,463,000	\$724,000	49%
Pilots & Demonstrations	9/17	\$22,873,787	\$8,954,577	39%
Research & Development	7/13	\$7,951,510	\$2,860,964	36%
Total	24/49	\$111,903,297	\$21,539,541	19%

2006 FINAL FUNDING AWARDS

CONSTRUCTION PROJECTS (4 awarded projects out of 12 applications)

Rank	DWR ID	Applicant	Project	Total Cost	Funds Requested	Awarded Grant
1	C-2006-04	East Bay Municipal Utility District	Low Energy Application of Desalination (LEAD) Project	\$14,640,000	\$3,000,000	\$2,900,000
2	C-2006-07	City of Sand City	Sand City Water Supply Project (SCWSP)	\$8,375,000	\$3,000,000	\$2,900,000
3	C-2006-10	Irvine Ranch Water District	Irvine Desalter Project and South Irvine Brine Line	\$36,600,000	\$1,000,000	\$300,000
4	C-2006-08	City of Oxnard, Water Division	GREAT Program Desalter - Blending Station No. 1	\$20,000,000	\$3,000,000	\$2,900,000
Subtotal				\$79,615,000	\$10,000,000	\$9,000,000

FEASIBILITY STUDIES (4 awarded projects out of 7 applications)

Rank	DWR ID	Applicant	Project	Total Cost	Funds Requested	Awarded Grant
1	F-2006-03	Sweetwater Authority	Otay River Basin Brackish Groundwater Desalination Study, Phase 1	\$499,000	\$242,000	\$242,000
2	F-2006-01	City of Arroyo Grande	South San Luis Obispo County Desalination Funding Study	\$90,000	\$45,000	\$45,000
3	F-2006-05	San Diego County Water Authority	Feasibility Study of a Regional Concentrate Conveyance Facility in San Diego County	\$500,000	\$250,000	\$250,000
4	F-2006-06	City of Oxnard, Water Division	Blending Station No. 3 Desalter	\$374,000	\$187,000	\$187,000
Subtotal				\$1,463,000	\$724,000	\$724,000

PILOTS AND DEMONSTRATION PROJECTS (9 awarded projects out of 17 applications)

Rank	DWR ID	Applicant	Project	Total Cost	Funds Requested	Awarded Grant
1	P-2006-05	East Bay Municipal Utility District	Bay Area Regional Desalination Project	\$1,898,600	\$949,300	\$949,300
2	P-2006-08	Municipal Water District of Orange County	Test Slant Well - Pilot Plant Treatment and Testing Phase	\$4,171,226	\$1,500,000	\$1,500,000
3	P-2006-11	Indian Wells Valley Water District	Pilot Testing of Zero-Liquid-Discharge Technologies Using Brackish Groundwater for Inland Desert Communities	\$1,189,000	\$578,500	\$578,500
4	P-2006-01	Los Angeles Department of Water and Power	Seawater Desalination Pilot Project	\$2,877,780	\$1,224,300	\$1,224,300
5	P-2006-12	Board of Water Commissioners of the City of Long Beach	Mitigating Water Quality Effects of Desalinated Seawater	\$2,270,000	\$1,000,000	\$1,000,000
6	P-2006-07	Bureau of Reclamation, U.S. Department of Interior	Vertical Tube Evaporator Geothermal Desalination Demonstration Project	\$3,693,500	\$1,500,000	\$1,318,605
7	P-2006-04	Affordable Desalination Collaboration	Optimizing Seawater Reverse Osmosis for Affordable Desalination	\$2,368,437	\$1,175,237	\$1,000,000
8	P-2006-14	City of Camarillo	City of Camarillo Brackish Water Desalination Pilot Study	\$767,744	\$383,872	\$383,872
10*	P-2006-10	City of Avalon	Catalina Large Diameter Membrane SWRO Energy Reduction Project	\$3,637,500	\$1,500,000	\$1,000,000
Subtotal				\$22,873,787	\$9,811,209	\$8,954,577

* Applicant of the project ranked 9 (Regents of the University of California) has been awarded grants for three other projects under this funding program.

RESEARCH AND DEVELOPMENT PROJECTS (7 awarded projects out of 13 applications)

Rank	DWR ID	Applicant	Project	Total Cost	Funds Requested	Awarded Grant
1	R&D-2006-07	West Basin Municipal Water District	Critical Raw Water Quality Issues Unique to Seawater: Marine Phytoplankton Blooms, their Associated Biotoxins, and Transient Urban Stormwater Inputs	\$1,245,800	\$496,483	\$496,483
2	R&D-2006-10	Bureau of Reclamation	Development of New Chlorine-Resistant Reverse Osmosis membranes	\$2,554,394	\$498,679	\$498,679
3	R&D-2006-09	University of California, Los Angeles	Advanced Monitoring, Optimization, and Control Technologies for High-Efficiency Membrane Desalination	\$1,068,256	\$500,000	\$500,000
4	R&D-2006-08	Colorado School of Mines	Novel Hybrid Membrane Desalination Process with Minimal Pretreatment and Concentrate	\$1,071,702	\$499,957	\$499,957
5	R&D-2006-06	Sweetwater Authority	Zero Discharge Solar Distillation Research and Development Project	\$990,800	\$481,500	\$481,500
6	R&D-2006-13	Lawrence Livermore National Laboratory	Desalination Using Carbon Nanotube Membranes	\$749,345	\$249,345	\$249,345
7	R&D-2006-04	Montara Water and Sanitary District	Subsurface Intake Filter Technology Evaluation	\$271,213	\$135,000	\$135,000
Subtotal				\$7,951,510	\$2,860,964	\$2,860,964
				Total Cost of Awarded Projects	Funds Requested by Grantees	Awarded Grants
GRAND TOTALS				\$111,903,297	\$23,396,173	\$21,539,541

These funding awards provide 49 percent of the fund to brackish water desalination projects and 51 percent to ocean/bay water desalination related projects with a statewide geographically balanced distribution. A map showing the geographical distribution of the projects awarded funding can be seen at http://www.owue.water.ca.gov/recycle/DesalPSP/Geographic_Dist2006.pdf.

With these grant awards, the State is funding well documented desalination construction projects with high potentials of success. Four construction projects will help create new water from the ocean/bay and unusable brackish groundwater to help local agencies meet their current or future water shortages through feasible desalination projects, which in turn, will create regional and statewide benefits. All applicable laws and concerns will be addressed before the implementation of the awarded projects. This implements Proposition 50 provisions that authorize the construction projects to benefit from this grant funding, allowing the State to have access to data, knowledge, and experience gained as a result of implementing the awarded projects and make knowledge available to other potential projects. The State is supporting feasible desalination projects while working toward meeting water supply benefits projected by the California Desalination Task Force and the 2005 California Water Plan Update. These funding awards are consistent with principles outlined in the PSP process of encouraging the development of all practical brackish water as well as ocean/bay water desalination technologies.

In the event an applicant declines the award for any reason, DWR reserves the right to reallocate the funds to other projects in the funding list or to not use the funds in this funding cycle.

REVIEW PANEL RANKING OF APPLICATIONS**PROPOSITION 50 WATER DESALINATION GRANTS - 2006 Funding Cycle***(Highlighted are projects awarded funding)***CONSTRUCTION PROJECTS**

Rank	DWR ID	Applicant	Project	Total Cost	Funds Requested
1	C-2006-04	East Bay Municipal Utility District	Low Energy Application of Desalination (LEAD) Project	\$14,640,000	\$3,000,000
2	C-2006-07	City of Sand City	Sand City Water Supply Project (SCWSP)	\$8,375,000	\$3,000,000
3	C-2006-10	Irvine Ranch Water District	Irvine Desalter Project and South Irvine Brine Line	\$36,600,000	\$1,000,000
4	C-2006-08	City of Oxnard, Water Division	GREAT Program Desalter - Blending Station No. 1	\$20,000,000	\$3,000,000
5	C-2006-11	Marin Municipal Water District	Bay Water Desalination Production and Distribution Project	\$26,200,450	\$3,000,000
6	C-2006-01	West Basin Municipal Water District	C. Marvin Brewer Desalter Enhancement Project	\$4,487,560	\$2,243,780
7	C-2006-02	Water Replenishment District of Southern California	Goldsworthy Desalter Expansion	\$16,088,150	\$3,000,000
8	C-2006-09	Marina Coast Water District	MCWD Urban Water Augmentation Plan Seawater Desalination Facility	\$21,129,300	\$3,000,000
9	C-2006-05	Carlsbad Municipal Water District	Carlsbad Desalination Project	\$294,000,000	\$3,000,000
10	C-2006-12	Cambria Community Services District	Cambria Desalination Project - Design and Construction	\$17,450,000	\$3,000,000
11	C-2006-06	Calleguas Municipal Water District	Calleguas Regional Salinity Management Project - Brine Line Phase 1C	\$19,000,000	\$3,000,000
12	C-2006-03	San Diego County Water Authority	Detailed Design of the Encina Regional Seawater Desalination Facility	\$12,000,000	\$3,000,000
Subtotal				\$489,970,460	\$33,243,780

FEASIBILITY STUDIES

Rank	DWR ID*	Applicant	Project	Total Cost	Funds Requested
